## Health Sector Decision Makers

This is a list of 7054 senior decision makers and administrators in the health system which includes public and private hospitals, area health services, clinics and government departments.

This database reflects in detail the size and complexity of Australia's health system and the complex labyrinth of area health services and health-related government departments, bodies and services.

The data is sourced from A-ZGovBIZ - Australia's leading supplier of Public Sector marketing lists. The database allows you to contact key decision makers in Government departments, Local Councils, Schools, Universities, TAFE Colleges, and Health Services via mail, email, phone and/or fax.

While many organisations find it challenging to maintain accurate contacts, our extensive data resources and team of expert researchers guarantees the deliverability of a highly comprehensive Public Sector database to your organisation.

With over 20 job functions and 20 industry categories to search on, you have the flexibility to be as specific as you want. This ensures that you are only contacting people who fit your exact selection criteria every time.

Data is available via the following methods:

Rental

Multi-Use 12 Months

Multi-Use Unrestricted

Annual License
